Because of the need to reduce our nations CO2 output (350 was safe) now about 424ppm globally. Over more than 20 years our best minds in finance and energy have developed

- A) Solar + Battery
- B) Smart Grid technology
- C) Unprecedented savings

[https://www.smartgrid.gov/the\\_smart\\_grid/smart\\_grid.html](https://www.smartgrid.gov/the_smart_grid/smart_grid.html)

We will soon be adding software to our solar and battery powered customers...This is the next step in building the Federal Smart Grid.

Maybe, we can include roofing & main power panel upgrade solutions in your cost.

Enjoy a power secured 2-way real-time 24/7 Digital network.

Types of services:

Unprecedented real-time in home care giving services like babysitting, elder care, ill/independent grandparents, tax services, doctor visits and other professional services from home.

This will result in rate increases because electricity is more valuable, so lock in your modern power rates now.

*Prepay for 25 years...or buy electricity monthly, like you are now...but pay less with a fixed rate (for 25 years) both with 10 different warranties & guarantees.*

Unprecedented control with lighting, Internet connectivity, voice control for hands-free control of various home functions, smart appliances, and enhanced security systems.

When you move, new home buyers will want and need modern power. We have 1 Million Installs and 74,000 transfers to new home buyers.

---

All of this, is so that our power grid will be Safe & Modernized

---

Take advantage now for the best deals on new products and services.

---

Remember the change when the rotary dial telephone was turned into a digital cell phone?

---

**Team Sofia, Allé, Ana & Firman have over 100 installs from Carpinteria to Beverly Hills that we've supported since 2015. We are part of a national power company.**

---

It's about to happen again... but this time your analog home is becoming digital.
